

## **FUND RAISING FOR HAJERA BEGUM**

Mrs. Hajera Begum, a 35-year-old widow and mother to orphan children, was facing an incredibly harrowing medical battle at the Owaisi Hospital & Research Centre ICU in Hyderabad. Her condition reached a critical tipping point following a **50% right-side brain haemorrhage**, necessitating three major surgeries, including high-risk neurosurgery. The complexity of her recovery is further compounded by a severe **MRSA infection** that has aggressively attacked her lungs, leaving her vitals unstable and requiring constant ventilator support through both oral and tracheostomy tubes. Now in strict isolation, her fight for life represents a profound struggle for a mother who remains the sole pillar for her children.

The cost of such intensive emergency care is overwhelming. So far, 6 lakhs had already been spent on her initial surgeries and ICU stay. However, with the need for continued treatment, the family was faced with an additional estimated cost of 8 lakhs. Realizing they could not manage this alone, a family friend reached out to the **Youth Sadqah Committee** for help.

The **Youth Sadqah Committee** quickly launched an urgent appeal to raise funds for Mrs. Hajera's hospital bills. The community responded with great kindness between **February 26th and March 2nd**, the committee raised **12,511 rupees**. These funds were sent directly to the patient's account to ensure her treatment continued without delay.

# FUND RAISING
